About Us

Krutanic is a fast-growing **EdTech** platform dedicated to empowering students & professionals with industry-relevant skills for the modern job market. Founded in 2024 and headquartered in **Bengaluru**, **Krutanic** focuses on bridging the gap between academic learning and real-world industry requirements.

At **Krutanic**, we believe learning should be flexible, engaging, and impactful. Our programs include interactive sessions, real-world projects, mentorship, and performance-based assessments to help students build strong portfolios and confidence.

Empowering Your Career with Trusted Partnership

Krutanic is aligned with the **National Skill Development Corporation (NSDC)**, ensuring our programs meet industry standards and deliver high-quality, job-ready training.

This partnership enhances credibility, practical learning, and career opportunities for our learners.

What Is **Krutanic** All About

Krutanic is an emerging **EdTech** platform focused on delivering career-oriented training designed to meet current industry demands. It aims to equip learners with **practical knowledge** and **skills** that are directly applicable in real-world job roles.

The platform emphasizes hands-on **learning** through structured programs that combine technical knowledge with **practical implementation**, enabling learners to gain exposure to industry tools, workflows, and problem-solving approaches essential for today's competitive environment.

Krutanic stands out by focusing on **skill development**, **real-time application**, and **continuous learning support**, with the goal of helping individuals enhance their capabilities, adapt to evolving industry trends, and build a strong foundation for long-term career growth.

Scope of Data Analytics in Market

10M+ Data Jobs Worldwide

Rapid growth in demand for data professionals

Fastest Growing Industry

Data Analytics is among the top emerging tech fields

80%+ Data Growth Every Year

Massive increase in structured & unstructured data

90% Businesses Data-Driven

Companies rely on data for decision-making

High Demand for Skilled Analysts

Organizations need data-driven insights

One of the Top In-Demand Careers

Strong job security & global opportunities

Shift Towards Data-Driven Decisions

Businesses depend on analytics, not guesswork

Data is the New Oil

Valuable asset powering modern companies

Job Roles Post Completion of the Program

Data Analyst

₹4-10 LPA

Business Intelligence (BI) Analyst

₹5-12 LPA

Data Scientist (Entry Level)

₹6-15 LPA

Data Scientist (Entry Level)

₹6-15 LPA

₹6-14 LPA

Analytics Consultant (Fresher)

₹6-12 LPA

KRUTANIC

A LADDER FOR BRIGHTER FUTURE

FEATURES OF THE PROGRAM

DATA ANALYTICS

Industry-Driven Curriculum

Built on real-world business data use cases, not just theory

Mentor-Led Learning

Guided by experienced data analysts & industry professionals

End-to-End Data Analytics Expertise

Data Cleaning → Exploration → Visualization → Insights

Hands-on Analytics Approach

Learn → Analyze → Visualize → Interpret → Present

Small Cohorts (High Attention)

Personalized mentorship & performance tracking

Real-World Data Projects

Work on datasets from finance, healthcare, e-commerce, etc.

Portfolio Projects

Build dashboards & case studies for job-ready portfolios

Data & AI Integration

Python, SQL, Excel, Power BI, Machine Learning basics

Career Acceleration Support

Resume, LinkedIn, portfolio & interview preparation

Outcome-Focused Training

Designed for real job roles like Data Analyst & BI Analyst

TOOLS & AI STACK

40+ Industry Tools You'll Master

DATA ANALYTICS FUNDAMENTALS

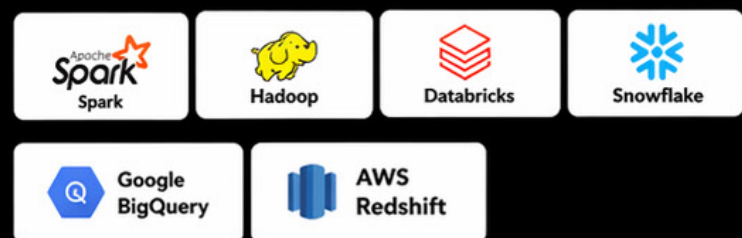

DATA VISUALIZATION & BI

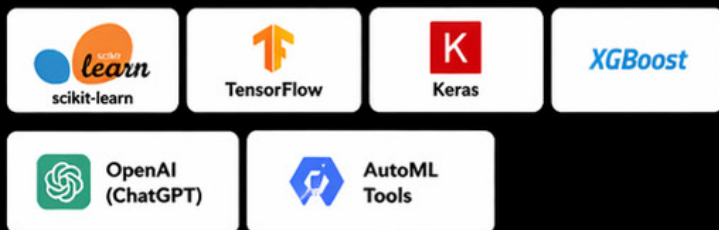

DATABASES & SQL

DATA PROCESSING & BIG DATA

AI & MACHINE LEARNING

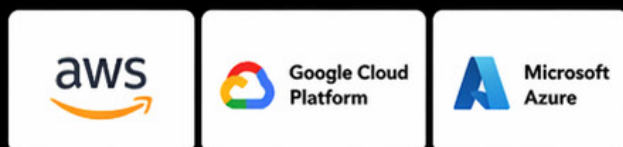

STATISTICS & ANALYSIS

DATA INTEGRATION & ETL

CLOUD PLATFORMS

★ EXTRA TOOLS INCLUDED

OUR HIRING PARTNERS

Where Our Alumni Work

MONTH 1:

DATA FOUNDATIONS, EXCEL & SQL

Objective: Build strong analytical & business fundamentals

TOPICS COVERED

Introduction to Data Analytics & BI Ecosystem

Roles, workflow & real-world applications

Understanding Business Metrics

Revenue, CAC, LTV, Retention

Pivot Tables & Dashboards

Interactive reports & business insights

Lookup Functions

XLOOKUP, INDEX-MATCH, VLOOKUP

Data Cleaning & Transformation

Handling missing data, duplicates & formatting

SQL for Data Analysis

Querying structured databases

Advanced Excel for Analytics

Formulas, data handling & automation

Joins, Aggregations & Filtering

Data extraction & summarization

Subqueries & Case Statements

Advanced SQL logic building

TOOLS

Excel

PROJECT

**Sales & Customer
Performance Dashboard**

MONTH 2:

PYTHON, DATA ANALYSIS & STATISTICS

Objective: Convert raw data into meaningful insights

TOPICS COVERED

Python for Data Analytics (Pandas, NumPy)

Data manipulation & numerical analysis

Data Cleaning & Exploratory Data Analysis (EDA)

Handling data, trends & insights

Business-Oriented Data Analysis

Solving real-world business problems

Statistics for Decision Making

Data-driven decision techniques

Descriptive Statistics

Mean, median, variance & distribution

Hypothesis Testing & A/B Testing

Experimentation & result analysis

TOOLS

Python

Jupyter Notebook

PROJECT

Customer Behavior & Insights Analysis

MONTH 3:

BUSINESS INTELLIGENCE & MARKETING ANALYTICS

Objective: Build dashboards & specialize in industry-relevant analytics

TOPICS COVERED

• BI Tools & Visualization:

Power BI / Tableau Fundamentals

Data visualization basics & tool interface

Data Modeling & Dashboard Design

Data relationships & dashboard structuring

KPI & Executive Dashboard Creation

KPI tracking & executive-level reporting

• Specialization: Marketing Analytics

Funnel Analysis (Awareness → Conversion)

User journey & conversion tracking

Campaign Performance Metrics

CTR, CPC, ROI & campaign analysis

Customer Acquisition Cost (CAC) & Lifetime Value (LTV)

Cost analysis & customer value measurement

Google Analytics (GA4) Fundamentals

Traffic tracking & user behavior insights

TOOLS

Power BI / Tableau

Google Analytics

PROJECT

Marketing Campaign Performance Dashboard

MONTH 4:

Advanced Analytics, Job Simulation & Career Acceleration

Objective: Become job-ready with real-world execution

TOPICS COVERED

- Advanced Analytics:

Cohort Analysis

Retention & Churn
Analysis

Revenue Optimization
Strategies

Real-World Job Simulation
(Key Differentiator)

- Work as a Data Analyst in a simulated company environment

Solve real business
problems

Work with raw datasets

Build dashboards
& reports

Present insights like in
real organizations

FINAL CAPSTONE PROJECT

End-to-End Business Analytics Case Study
(E-commerce / SaaS / Marketing)

MONTH 5:

Capstone Project

Capstone Overview

Students will integrate all their learning into a comprehensive, real-world project.

Topics Covered:

- End-to-End Data Cleaning

- SQL Querying

- Python Analysis

- Power BI Dashboard Creation

- Final Business Presentation

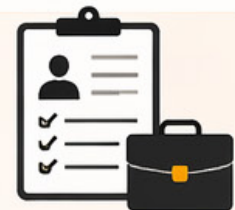

MONTH 6:

Placement Preparation

Placement Overview

This module prepares students to confidently enter the job market with industry-ready skills. It includes resume building, interview preparation, mock interviews, aptitude training.

Topics Covered:

- Resume Building

- LinkedIn Optimization

- Mock Interviews

- Case Study Practice

- Portfolio Review

Live Interactive Classes

Learn directly from industry professionals in real-time sessions designed for engagement, doubt-solving, and practical learning through discussions, case studies, and hands-on activities.

Mon-Fri
Learn Live with
Industry Experts

Mock Interviews & Career Preparation

Practice real interview scenarios, receive expert feedback, prepare with resume building, LinkedIn optimization, and job-focused guidance confidently secure opportunities.
